

Our Fleet Management Solution (FMS) delivers ROI well beyond the first year of fuel savings. In addition to helping you reduce fuel consumption; operational efficiencies and improving field staff management can all be attained. Our FMS will:

- **Help you to sell more by providing competitive advantage**
- **Reduce overheads by automating timesheet and man-hour reports**
- **Provide the tools to manage your Mobile Workforce more effectively**

According to Zurich, fleet management solutions could cut companies' fleet running costs by 10% and save up to 11% on fuel bills.

IRIS has developed a range of value added services for a world renowned Leasing, Rental and Fleet Management Services Business to support sales development and customer retention strategies. The range of services include the development of in

vehicle and back office systems to ensure that data acquired remotely from the vehicle CAN Bus and the Tachograph can be downloaded, enabling valuable specific driver information to be analysed alongside actual vehicle data.

The FMS solution is typically made up from one or more of the following

- Comms Hub
- Fleet Manager Portal
- FMS unit
- Non-branded hardware

Truly adaptable and delivering a highly functional solution, FMS provides:

Operational Efficiency

- Route Management
- Transport White Board
- Driver Vehicle Check
- Vehicle Location
- Vehicle/Route Alerts
- Driver Debriefs

Operational Efficiency

- Vehicle Performance
- Driver Style Profiling
- Journey Reports

Compliance and Best Practice

- Driver Hours Reports
- Carbon Report

Powerful Automated Reports

Behind Fleet Manager sits an exceptionally powerful platform that is capable of processing complex data sets and algorithms in an instant. This results in a class-leading, flexible reporting engine with a full suite of reports, ranging from very detailed to high level.

In addition to this FMS and CANBus information is supported when using IRIS FMS.

Run reports by vehicle, fleet, driver or team. All are generated in an easy-to-read format that can be printed, saved or set to send automatically to one or more recipients. Most reports allow you to jump to the detailed map view in one click. You can also save your setup for one-click reporting.

Extensive APIs

FMS seamlessly integrates with our open-standards platform, Comms Hub, for a complete end-to-end enterprise solution. All solutions adhere to an industry standard open architecture.
